## Weather Radio – 30 sec.

Don't let sudden flooding conditions catch you off guard. You need a NOAA weather radio. A weather radio is like a smoke detector for severe weather and hazardous conditions. The radio's alarm feature can even wake you up at night during severe weather and give you and your family time to seek appropriate shelter. Most electronics stores sell weather radios. Look for a radio with S-A-M-E technology that lets you program it to alert you only for the emergencies that affect your area.
